EXPERIENCE

BACKEND DEVELOPER

Fazo Software LTD

2023 - Present

- Developed and deployed a Face ID Surveillance system, ensuring local operation for enhanced security. Utilized machine learning algorithms for identity detection.
- Created asynchronous automation bots for Telegram.
- Implemented various backend services, including emailing and real-time chat applications, using popular Python frameworks such as Django, websockets, and FastAPI.
- Designed databases using in-demand technologies like MongoDB, PostgreSQL, and SQLite.
- Containerized projects with Docker and deployed them using NGINX on Ubuntu Server.

PYTHON PROGRAMMING LANGUAGE MENTOR

IT School Namangan

2022 AUG - 2022 DEC

In my brief journey in this field, I have:

- Introduced fundamental concepts of the Python programming language.
- Collaborated with students to create and enhance simple web applications.
- Honed and expanded my communication skills through learning and practice.
